

# MISSOURI CLASS STARSHIP

**The Missouri Class Battleship was the most common of Starfleet's super heavy combatants during the last quarter of the 23<sup>rd</sup> century. Constructed to directly combat the B11 of Klingons the Missouri fought many battles.**

The main hull form resembled both the Miranda and Oberth Classes. Despite that the hull is strong and able to take an enormous pounding massing over 8million tons. Missouri is 793 m long and armed with a huge battery of phasers and many photon torpedo tubes. An assault phaser cannon and a Quantum Carrier Wave Beam projector round out the load. 1190 crew make boarding attempts a bad idea as well. Only the shuttle bay and impulse engines seam lacking making Missouri poor at maneuvering and a bad candidate to support large scale evacuations.
